Business Requirements Document (BRD) — [Project name]

Field	Entry
Project	[Project name]
Document	Business Requirements Document
Version	[1.0]
Date	[YYYY-MM-DD]
Author	[Name]
Approver	[Product owner name]
Status	Draft / In review / Approved

Workflow step: 1. Business pain point / requirement. **Next step:** 2. Gap analysis.

1. Summary

[One or two sentences: what the product does, for whom, and the main outcome.]

2. Business problem

Guidance: describe the pain point in the users' terms. Who is affected, what they do today, why that is not good enough, and what it costs them.

- **Who is affected:** [user groups]
- **Current situation:** [how they solve it today]
- **Why it is not good enough:** [cost, time, quality, access, risk]
- **The gap:** [the one-sentence gap this project closes]

3. Objectives and success metrics

Guidance: every objective needs a number that can be measured at project closure.

#	Objective	Success metric	Target	How measured
O-1	[Objective]	[Metric]	[n]	[Test, survey, report]
O-2	[Objective]	[Metric]	[n]	[ ]
O-3	[Objective]	[Metric]	[n]	[ ]

4. Scope

In scope (this version)

- [Feature or capability]
- [Feature or capability]

Out of scope (this version)

- [Excluded item] — [reason or later version]
- [Excluded item] — [reason or later version]

5. Stakeholders and users

Stakeholder	Role / interest	Name
Sponsor	Funds the project; final escalation	[ ]

Stakeholder	Role / interest	Name
Product owner	Owns requirements; approves UAT and release	[ ]
Development team	Builds the product	[ ]
QA team	Tests against requirements	[ ]
UAT testers	Real users who accept the product	[ ]
End users: [group]	[Need]	—

6. Business requirements

Guidance: one testable statement per row. Priority uses MoSCoW: Must, Should, Could (Won't goes in out of scope). Keep IDs stable; never reuse a deleted ID.

ID	Requirement	Priority	Acceptance condition
BR-01	The user can [action] so that [benefit].	Must	[Measurable condition]
BR-02	[ ]	Must	[ ]
BR-03	[ ]	Should	[ ]
BR-04	[ ]	Could	[ ]

7. Non-functional requirements

ID	Area	Requirement
NFR-01	Platforms	[Supported operating systems, browsers, devices]
NFR-02	Performance	[Response time, throughput, processing time]
NFR-03	Security and privacy	[Data handling, access, compliance]
NFR-04	Reliability	[Uptime, error handling, recovery]
NFR-05	Usability	[Accessibility, languages, steps to complete a task]
NFR-06	Licensing	[Allowed licences for libraries, models, assets]
NFR-07	Hardware / infrastructure	[Minimum and recommended]

8. Assumptions, constraints and risks

Assumptions

- [Something believed true that the plan depends on]

Constraints

- [Fixed limits: technology, budget, deadline, regulation]

Risks

Risk	Impact (High / Medium / Low)	Likelihood	Mitigation
[Risk]	[ ]	[ ]	[ ]

9. Budget and timeline

Item	Value
Budget	[Amount or "to be set"]

Item	Value
Target release date	[YYYY-MM-DD]
Key milestones	[Spike done, development done, UAT, release]

10. Open questions

Guidance: each question is answered in step 2 (gap analysis) or by the product owner. Tick and record the answer when decided.

- ☐ [Question] — owner: [name]
- ☐ [Question] — owner: [name]

11. Decisions and change log

Version	Date	Change	Reason / change request
1.0	[YYYY-MM-DD]	First version	—

12. Approval

Role	Name	Signature	Date
Product owner	[ ]		
Sponsor	[ ]
