Gap Analysis / Requirement Analysis — [Project name]

Field	Entry
Project	[Project name]
Document	Gap Analysis / Requirement Analysis
Version	[1.0]
Based on	BRD v[x.x]
Date	[YYYY-MM-DD]
Author	[Name]
Status	Draft / In review / Approved

Workflow step: 2. Gap analysis / requirement analysis. **Next step:** 3. Spike / feasibility.

1. Summary

[n] of [n] business requirements are High feasibility, [n] Medium and [n] Low. The biggest gaps are:

1. **[BR-xx]:** [why it is hard and what closes it]
2. **[BR-xx]:** [ ]
3. **[NFR-xx]:** [ ]

2. Current vs target state

Aspect	Current state	Target state
[Process or capability]	[How it works today]	[How it will work]
[ ]	[ ]	[ ]

3. Gap per requirement

Guidance: Feasibility **High** = ready tools or skills exist; **Medium** = exist but need tuning or integration; **Low** = needs new data, research or invention.

ID	Available today	Gap	Action to close	Feasibility
BR-01	[Existing tool, library, team skill]	[What is missing]	[What will be done]	High / Medium / Low
BR-02	[ ]	[ ]	[ ]	[ ]
NFR-01	[ ]	[ ]	[ ]	[ ]

4. Technology and licence options

Component	Candidate	Licence	Commercial use	Notes / status
[Component]	[Option A]	[MIT / Apache 2.0 / GPL / proprietary]	Yes / No / Conditional	[Chosen / excluded / to test]
[Component]	[Option B]	[ ]	[ ]	[ ]

Guidance: check every licence at its source (model card, repository, vendor terms) and record the date checked.

5. Requirement analysis

Refined, testable requirements

ID	Original wording	Refined, testable wording
BR-xx	[From BRD]	[Measurable acceptance condition]

Dependencies (build order)

1. [Component that everything else needs]
2. [Next]
3. [Next]

Answers or working assumptions for BRD open questions

Open question	Answer or working assumption	Decided by
[Question]	[ ]	[Name / pending]

6. Decisions needed and what the spike must prove

Decisions for the product owner

☐ [Decision]
☐ [Decision]

Questions for step 3 (spike)

#	Question	Pass condition
1	[Does approach X work end to end?]	[Measurable result]
2	[Which option is better for Y?]	[ ]

7. Change log

Version	Date	Change
1.0	[YYYY-MM-DD]	First version
